## HYDROGEOLOGIST/GROUNDWATER MODELLER/GROUNDWATER MODELER

### *Job Description:*

GCS has a vacancy for a mid to senior level Hydrogeologist/Groundwater Modeller in either the JHB/Pretoria Office. The position requires at 5-15 years experience in Hydrogeology and at least 3-10 years experience in Modelling. Qualifications required for the position is a BSc Honours degree in Hydrogeology. An M.Sc degree and the ability to speak French will be an advantage.

### *Job Skills:*

- Ability to manage complex groundwater projects/components
- A good understanding of water related issues in the mining sector
- Fieldwork and subcontractor management
- Excellent data interpretation skills and formulation of hydrogeological conceptual models
- Conceptual and numerical models
- Knowledge and experience in Reporting
- Assist in Marketing and Client Development
- Mentoring of junior staff
- Solid technical expertise
- Good numerical modelling skills
- Good project management and report writing skills
- Good communication and client skills
- Strong computer literacy skills (MS Office, GIS, Finite Element/Finite Difference Modelling)

This position requires a Hydrogeologist/Groundwater Modeller who manages complex hydrogeological projects related to the mining sector. Groundwater modelling experience is required. The candidate must be able to work independently and/or as a team with engineers, environmentalists, hydrologists and geochemists.

Remuneration: Total Cost to Company Package will be negotiated according to the candidate's knowledge and experience.

If you possess the relevant qualifications and experience, please forward your CV to: neermalam@gcs-sa.biz
