

Hydrogeology Journal – Editors' Choice Articles

The International Association of Hydrogeologists (IAH) is a scientific and educational charitable organisation for scientists, engineers, water managers and other professionals working in the fields of groundwater resource planning, management and protection. *Hydrogeology Journal* is the official journal of IAH.

"Editors' Choice" articles are selected for special attention by the Hydrogeology Journal editorial team, for any of several good reasons including: outstanding science, innovative approach, potentially important conclusions, interesting field area or phenomenon, unusual topic, political/social/historical/philosophical interest, etc. At the conclusion of each publishing year, the Editors select up to five articles from among the year's crop of about 200 peer-reviewed published articles. All articles selected since the start of the scheme (2010) are listed here.
