

MAKING THE INVISIBLE VISIBLE

**Join the Table Mountain Water Source Partnership
for the long awaited virtual launch of the Cape
Town Groundwater Dashboard.**

In response to the threats presented by Day Zero, many Capetonians looked to groundwater for solutions. This, until now, has been a resource on which we could not readily access much information about usage, availability and supply. The development of the Cape Town Groundwater Dashboard offers everyone an accessible and unique tool that freely shares available groundwater information for the Cape Town area.

**24 March 2022
09:30 - 10:30 (SAST)**

REGISTER

Register your attendance to this launch webinar where we will be taking you on a virtual walk through of the digital dashboard and drill into some of the benefits this tool can provide to individuals and industries alike.
