

MONDAY 27 MAY – WEDNESDAY 29 MAY 2024

# FEFLOW INTRODUCTORY TRAINING

## Invitation

As part of EkoSource Insight's agent commitment to continued support of the DHI Software in the SADC region, we cordially invite you to a three-day, hands-on FEFLOW training course. This course will provide you with an introduction to groundwater modelling using the DHI FEFLOW Software.

FEFLOW is widely recognised as a most comprehensive software package for subsurface flow and transport simulation. FEFLOW's unique mesh (structured and unstructured) provides the highest degree of flexibility in all modelling processes. The software is used by leading research institutes, universities, consulting firms and government organisations all over the world.

FEFLOW's scope of application ranges from simple local scale to complex large-scale modelling. Application areas include water management, mine water, saltwater intrusion, geothermal energy, and variably saturated media.

**Trainer:** Dr Amy Allwright (Lecturer at Stellenbosch University).

**Venue:** Cape Town (TBC)

**Cost:** R 6 000,00 (Excluding VAT) per person.

### What is Provided:

- ❖ Electronic Training Material
- ❖ Temporary Software Licence
- ❖ Lunches and Snacks
- ❖ Training Certificate.

Participants will need to bring their own laptops for the training.

We are keeping the training group as small as possible to enable a hands-on personal training experience and in view of this we can only accommodate 12 participants for the training.

Solutions to help you create a better tomorrow
