

Drilling Supervision: Practical field demonstration

Event description

The Short Learning Programme is designed for all professionals within the groundwater industry. The course aims to provide hands-on experience and theoretical background for site selection, drilling, drilling supervision, borehole construction and borehole development.

Who should attend?

This course is open to all interested parties although knowledge of groundwater concepts and principles are recommended in order to gain maximum benefit from this course.

All professionals working within the groundwater industry would find this a great refresher and also opportunity to reflect on practices.

Young Professionals, Graduates and students would also find immense value from attending this course instructed by the Institute for Groundwater Studies (IGS) Lecturers/ Professionals and joining in this session with all the current IGS honors' students would ensure you get exposed to the latest learning put into practice.
